Fintech Intern

I am a dedicated and hardworking computer science student with a strong interest in the fintech sector. I possess exceptional problem-solving skills, leadership abilities, and creativity, which I have demonstrated through managing a Shortlet apartment, where I streamlined operations and enhanced guest satisfaction, and creating engaging social media content for a recycling company, significantly increasing their online presence. My passion for continuous learning and professional growth drives me to stay updated with the latest technological advancements. I am deeply enthusiastic about financial literacy, trading, and leveraging technology to create financial solutions that help people make money. My diverse experiences have equipped me with a unique skill set, making me well-prepared to contribute to innovative Fintech solutions that enhance financial well-being.
